

Job ID:	32514 (position #00049584)
Location:	Vancouver – Point Grey
Employment Group:	Faculty (Fac Assn)
Classification Title:	Professor (tenure)
Business Title:	Professor (tenure) – Tier 1 Canada Research Chair
Faculty:	Faculty of Applied Science
Department:	School of Nursing
Desired Start Date:	07/01/2019
Closing Date:	02/18/2019

Canada Research Chair - Tier I in Nursing
Professor
UBC School of Nursing

The University of British Columbia (UBC), Vancouver campus, is nominating a recognized leader in gender-based health research for a Tier 1 Canada Research Chair (CRC) position. This position is at the School of Nursing, Faculty of Applied Sciences. The Chair position is for emergency retention at the rank of Professor.

The Chair holder is an outstanding researcher, acknowledged as a world leader in the field, with a track record of fostering collaborative and interdisciplinary research. The Chair holder will articulate a strategic plan for further developing their exemplary research program, which will complement ongoing research programs at UBC and will engage with local, national, and international research networks. All Chair nominations are subject to review and final approval by the CRC Secretariat. Information about the CRC program is available at <http://www.chairs-chaires.gc.ca>.

The nominee is a prominent research-intensive full professor with an international network of collaborators, a highly productive scholarly agenda, and provides effective teaching and mentoring of undergraduate and graduate students. The nominee contributes and continues to lead in UBC School of Nursing's strategic priorities in gender-based analysis and health. The gender-based research includes influences on health behaviours and illness management, and its impact on families and overall life quality. Research findings inform a suite of gender-sensitized interventions amid offering guidance to clinicians and researchers to advance physical and mental health. The professor brings significant expertise in knowledge mobilization of research to practice, policy and public awareness. The Chair holder will have reduced teaching responsibilities but is expected to participate in undergraduate and graduate teaching activities and to provide service to the School and University academic and broader communities.

Established in 1919, the UBC School of Nursing has 100 years of experience educating nursing leaders and innovating research. The School of Nursing is comprised of a group of outstanding faculty committed to excellence in scholarship, teaching, research, community engagement, and professional leadership. The UBC School of Nursing is home to the first university degree program in nursing in the Commonwealth and was one of the first academic programs established at UBC after the university's inception in 1915. We offer undergraduate and graduate programs taught by experienced and award-winning faculty members, who are licensed nurses registered with the British Columbia College of Nursing Professionals (BCCNP) (<https://www.bccnp.ca>).

The Faculty of Applied Sciences shares the University's commitment to research excellence, and in addition to the School of Nursing, it houses the School of Architecture and Landscape Architecture, the School of Community and Regional Planning, and all engineering activities at the Vancouver campus and the UBC Okanagan School of Engineering.

The University of British Columbia, established in 1908, is rated among the top 40 research-intensive universities in the world. UBC's Vancouver campus is located on the point of a peninsula looking out towards the Pacific Ocean and surrounded by forest. Vancouver is a vibrant cosmopolitan city that has a wealth of recreational opportunities and is considered one of the most livable cities in the world.

In assessing applications, UBC recognizes the legitimate impact that leaves (e.g., maternity leave, leave due to illness) can have on a candidate's record of research achievement. These leaves will be taken into careful consideration during the assessment process.
